FOR IMMEDIATE RELEASE

Kansas Council for Economic Education receives \$10,000 grant
from Cloud L. Cray Foundation of Kansas City, Missouri

Kansas Council for Economic Education receives \$10,000 grant from Cloud L. Cray Foundation of Kansas City, Missouri.

The Cloud L Cray Foundation grant will fund students' participation from Johnson, Atchison and Wyandotte county schools in the Stock Market Game facilitated by the Kansas Council for Economic Education.

The Stock Market Game is an investing simulation which incorporates math, personal finance & critical-thinking skills. Lessons are correlated with state & national standards and can be integrated into almost any subject area.

Brian Watson, Director for the Cloud L Cray Foundation, said that their primary purpose is to support financial literacy for K-12 students in Northeast Kansas and Northwest Missouri through experiential learning. Ultimately, the Foundation hopes to improve the financial responsibility and decision making of the next generation of citizens in the region.

The Kansas Council for Economic Education is grateful to investors who allow students to participate in these types of economic literacy activities at no cost to the student or school.
