data will be provided

## Part 1: Departmental Purpose, Relationship to the University Mission and Strategic Plan engagement

Please list the program purpose statement. Explain in 1-2 concise paragraphs the role of the program and tie them to the University mission (printed below) and strategic plan.

*The mission of Wichita State University is to be an essential **educational, cultural and economic driver** for Kansas and the greater public good.*

---

### *A. Program Purpose Statement - formerly Mission*

(If more than one program, list each purpose statement):

The Vision of the WSU PA Program is “Excellence in PA Education”

The Mission of the WSU PA Program is to transform students into highly competent PAs.

Our Guiding Principles are to:

1. Foster an enthusiastic learning environment committed to student success
2. Promote patient-centered collaborative care
3. Model and cultivate compassion
4. Respond to the need for primary care providers in Kansas
5. Encourage healthcare for rural and underserved populations
6. Emphasize evidence-based practice and promote lifelong learning

### *B. The role of the Program(s) and relationship to the University mission:*

As the only PA program in Kansas, the WSU PA Program is an essential part of the Kansas educational and healthcare landscape. Two-thirds of the 105 Kansas counties are designated as rural or frontier and 89% (all but 12) are federally designated Health Professional Shortage Areas.<sup>1</sup> The WSU PA Program commits to the greater public good by providing primary care providers throughout Kansas who serve rural and underserved populations. The Program uses evidence-based admissions and training practices to recruit and encourage graduates to practice rural primary care. A 2016 national survey indicated that WSU is 8<sup>th</sup> in the nation with the highest number of graduates practicing in rural locations.<sup>2</sup>

As an economic driver for Kansas, the WSU PA Program attracts talented individuals from across the country, many of whom stay to work and live in Kansas after graduation. WSU Graduate School Exit Survey from 2017-2019 indicate that only 3.5% of graduates accepted a job outside of KS. The average starting salary for a WSU PA graduate in Kansas is high at \$97,497 with excellent growth potential.<sup>3</sup> The median base salary for

---

<sup>1</sup> University of Kansas Institute for Policy & Social Research, *Kansas Statistical Abstract, 2017*, University of Kansas Institute for Policy & Social Research, Lawrence, KS. Sep 2018.

<sup>2</sup> Rural Health Research & Policy Centers. Which PA training programs produce rural PAs? A national study. *Rural Health Research Center Policy Brief #154*. Feb, 2016. [www.ruralhealthresearch.org](http://www.ruralhealthresearch.org).

<sup>3</sup> American Association of Physician Assistants (AAPA). *2019 AAPA Salary Report*. 2019.

PAs in Kansas is \$100,000 (\$108,000 adjusted per cost-of-living) as compared to \$106,000 nationally.<sup>4</sup> Demand for PAs is high regionally and nationally and the US Bureau of Labor Statistics projects job growth of 37% over the next 10 years, much faster than other occupations.<sup>5</sup> The WSU PA Program offers excellent value – the mean educational loans for WSU PA students is half of that reported nationally for PA Programs (\$45,000 vs. \$97,360.<sup>6,7</sup> WSU PA Program resident tuition/fees (\$39,445) are below the national average for public universities (\$50,289) and are the third to the lowest out of the region's 14 programs (range \$35,164 to \$74,145). WSU PA Program non-resident tuition/fees (\$79,332) are also below national average for public universities (\$88,677) and the fifth lowest in the region (range \$54,741 to \$133,925), see **Appendix A**.<sup>8,9</sup>

C. *Has the purpose of the Program(s) changed since last review?*  Yes  No

If yes, describe in 1-2 concise paragraphs. If no, is there a need to change?

The PA Program vision/mission and guiding principles are reviewed annually during development of Program goals. The Program's vision/mission and guiding principles are congruent with CHP and University mission statements, accurately reflect Program values, and drive Program assessment and improvement.

D. *How does the Program support the university strategic plan?*

WSUs vision is to be globally recognized as the model for applied learning and research. Consistent with the strategic plan to support this vision, every PA student engages in applied learning in research, service, professionalism, and interprofessional education. The PA curriculum enables students to integrate and enhance personal development of key PA competencies such as professionalism, interpersonal skills, patient care skills, compassion, sensitivity to diversity, and practice-based learning through experiential learning activities, which are both faculty-led and student-led. Additionally, in alignment with the University priority focused on research and economic development, the PA program has well established applied learning opportunities and partnerships with local, regional, and state industry and government including Wesley Healthcare, Ascension Via Christi, and Robert J. Dole VA Medical Center.

The WSU PA Program is committed to the University's priority of community engagement. The Program's rate of 100% student engagement in volunteer community service far exceeds the College of Health Professions rate of 63% and the University rate of 28%.<sup>10</sup> PA students and faculty serve as a catalyst for positive social change through active participation in initiatives such as Medical Mission at Home, the Ready-Set-Fit health education program for elementary children, Senior Saturdays at Larksfield Place, health topic presentations at a socioeconomically distressed high school, and more, see **Appendix B**.

<sup>10</sup> Wichita State University Graduate School Exit Survey Data. 2017-2019, most recent available.

*E. Provide an overall description of your program (s) including any changes made since the last review?*

**Program Description:** The Master of Physician Assistant (MPA) degree is a rigorous 26-month, 93 credit-hour, lock-step graduate program that prepares students to function as competent and safe generalist PAs. The first 14 months are didactic in nature including 50 credit hours of clinical medicine and science coursework followed by 12 months of clinical rotations across the state of Kansas and beyond. *The Program increased from 83 to 93 credit-hours beginning Summer 2017 (graduating Class of 2019).* The increase was necessary to more accurately reflect current contact time which had gradually increased over the years due to increases in medical knowledge and expectations of practicing PAs.

**Program Self-Assessment Plan:** A variety of data are useful to the Program for identifying strengths and opportunities for improvements. The PA Program uses a systematic and robust ongoing self-assessment process to review quality and effectiveness of educational practices, policies, and outcomes within the context of the University, College, and Program vision/mission and guiding principles. Self-assessment is an ongoing process designed to identify programmatic strengths/weaknesses and implement continuous quality improvement plans. See *Program Self-Assessment Policy/Procedure*, **Appendix C**.

**Program Goals:** The measurable Program goals are to meet our six guiding principles to **1)** Foster an enthusiastic learning environment committed to student success; **2)** Promote patient-centered collaborative care; **3)** Model and cultivate compassion; **4)** Respond to the need for primary care providers in Kansas; **5)** Encourage healthcare for rural and underserved populations; and **6)** Emphasize evidence-based practice and promote lifelong learning. Outcomes for these Program goals are measured using a variety of assessments and benchmarks as outlined in the *Outcomes Measures of Success* document, see **Appendix D**.

**Program Mission:** To achieve the mission of transforming students into highly competent PAs, competencies and learning outcomes necessary for a beginning practicing professional are incorporated into the Program curriculum. These measurable learning outcomes are aligned with NCCPA Core Competencies for the PA Professions. **Appendix E** *Learning Outcomes Curriculum Assessment Crosswalk* links these six principal competency areas (see below) with the 23 individual learning outcomes, the curricular components used to gain each competency, and the assessment tool for each learning outcome. **Appendix F** *Assessment of Learning Outcomes, Results, and Analyses* displays results and analyses of key assessment tools.

**Principal Competency Areas for the Learning Outcomes**

1. Demonstrate core **medical knowledge** about established and evolving biomedical and clinical sciences and the application of this knowledge to patient care.
2. Demonstrate **interpersonal and communication skills** that result in effective information exchange with patients, patients' families, physicians, professional associates, and other individuals within the healthcare system.
3. Demonstrate **patient care** that is effective, safe, high quality, and equitable.
4. Acknowledge **professional** and personal limitations; demonstrate a high level of responsibility, ethical practice, sensitivity to diverse patient populations, and adherence to legal/regulatory requirements.
5. Engage in critical analysis of their own practice experience, the medical literature, and other information resources for the purposes of **learning and self- and practice-improvement**.
6. Demonstrate an awareness of and responsiveness to the larger **system of healthcare** to provide patient care that balances quality and cost, while maintaining the primacy of the individual patient.

## Part 2: Faculty Quality and Productivity as a Factor of Program Quality

The quality of the program/certificate as assessed by the strengths, productivity, and qualifications of the faculty in terms of scholarly/creative activity and service. (Refer to instructions in the WSU Program Review Instructions for more information on completing this section. Tables 4 (Instructional FTE), 6 (Program Majors) and 7 (Degree Production) from OPA can be used to help with this section.)

Complete the table below for the faculty who support the program (all faculty who signed or should have signed the coversheet).

| Table 1. Departmental Outputs |                      |         |                      |         |                        |         |           |            |                           |                |
|-------------------------------|----------------------|---------|----------------------|---------|------------------------|---------|-----------|------------|---------------------------|----------------|
| Scholarly Productivity        | Num Journal Articles |         | Number Presentations |         | Conference Proceedings |         | Num Books | Book Chpts | Num. Grants Award/ Submit | \$ Grant Value |

A. Briefly explain the standards in place in your college/department for the evaluation of your faculty research/scholarship/creative activity.

Departmental Standards: The Program benchmark has historically been that the WSU PA Program faculty means should be at or above national norms as reported by the Physician Assistant Education Association (PAEA). These scholarly data are reported differently than what is required for Table 1 above. Data are reported as career totals for faculty with at least one publication of that type.

| Career Totals                                                         | WSU PA Mean            | National PA Mean |
|-----------------------------------------------------------------------|------------------------|------------------|
| Peer-reviewed journal articles                                        | 14.6 (73/5) range 1-30 | 5.4 range 1-150  |
| Books/Book Chapters                                                   | 4.0 (20/5) range 0-14  | 1.3 range 1-25   |
| % Faculty with at least one publication over the span of their career | 63% (5/8)              | 47%              |

B. Provide a brief assessment of the quality of the faculty/staff using the data from the table above. Include details related to productivity of the faculty including scholarship/research and creative activity and services. (i.e., some departments may have a few faculty producing the majority of the scholarship), service, efforts to recruit/retain faculty, departmental succession plans, etc.

Faculty Scholarship: The Program's three tenured faculty currently produce the bulk of the scholarship, but all faculty are engaged in scholarly pursuits at a level commensurate with expected roles. New faculty are supported with focused mentoring in scholarship and student research projects. Although WSU PA faculty publication rates continue to exceed national norms, this is likely to change when currently tenured faculty

retire in a few years. No faculty have been hired on tenure-track since 2011. Faculty continue to meet College and University expectations with regards to scholarship as evidenced by successful receipt of tenure and/or promotion on the clinical track when sought.

*FY Summation of SCH and Degree Production:* With a lock-step curriculum and capped enrollment, Program Student Credit Hour (SCH) production remains relatively steady and is dependent upon enrollment maximums, student attrition, and Program credit hour requirements. Currently the maximum SCH production is **4,464 CH annually**. This figure assumes no attrition (48 students per cohort) x 93 CH total. The 93 required CH for the Program include 84 CH listed under PA, 6 CH listed under HS and 3 CH listed under HP which are all taught by core PA Program faculty. The total Program credit hours increased from 83 credit hours to 93 credit hours beginning Summer 2017 (an 11% increase in SCH). The 5-year rolling average degree production is 46 MPA students per year.

*Instructional FTE Employed and SCH Production by FTE:* The Program 5-year average (2013 – 2017) for SCH production by FTE is in line with University norms (204 Program Level vs. 220 University Level), and less than the College Level of 316. All but 6 of the 54 didactic credit hours (89% of credit hours) are taught by core PA faculty as compared to 69% nationally.<sup>11</sup> Faculty workload is determined collaboratively between individual faculty and Program Director.

*Quality of Faculty/Staff:* The quality of faculty is strong. All faculty have a terminal degree. The faculty team has adequate breadth and depth of training and experience including pharmacology, emergency medicine, family medicine, trauma/acute care, orthopedics, surgery, long-term care, women's health, pediatrics, geriatrics, gastroenterology/hepatology, ophthalmology, and research. Faculty have worked in rural, urban, underserved, and international practice settings and most continue to work or volunteer clinically. Faculty have a combined 120 years clinical experience and 80 years teaching experience. Faculty have received numerous College, University, state and national teaching and research awards. The Program has excellent community support through guest speakers and clinical preceptors. Faculty carefully select guest speakers from across Kansas to augment clinical topic areas, provide multiple perspectives, communicate the subtleties of a topic from a position of expertise, and expose students to a variety of health professionals and future colleagues. Core faculty have control over guest speaker selection and monitor and evaluate speakers/lectures to ensure quality.

The average length of time in primary position for WSU PA faculty is 9.8 years, 1.7 times the national average of 5.8 years) indicating an experienced faculty with good retention.<sup>12</sup> Faculty have successfully received tenure/promotion when sought demonstrating performance within teaching, scholarship, and service commensurate with expected College and University roles. However, the percentage of faculty who are tenured/tenure-track has now fallen below national norms (33% vs. 42% nationally). If the trend in hiring non-tenure-track faculty continues, meeting national benchmarks and CHP and University scholarly goals may become unrealistic.

---

<sup>11</sup> Physician Assistant Educator Association (PAEA). *By the Numbers: Program Report 34 (2018 Data)*. Oct 2019.

<sup>12</sup> Physician Assistant Education Association (PAEA). *PAEA By the Numbers, Faculty & Directors Report 4*. Data from 2018 Survey.

Faculty/course review processes are rigorous and multifaceted. Faculty complete a Post-Course Assessment Form at the conclusion of each course to include discussion of: 1) significant course changes, 2) analysis of SPTE quantitative data/data trends, 3) thematic analysis of student comments related to the course and faculty, 4) analysis of student performance within the course/data trends (e.g. grade distribution, numbers of academic warnings and exam remediations, student performance on national standardized exams and End-of-Program Summative Evaluations), and 5) improvements or changes for future course offering supported by data analyses. Faculty perform peer-evaluation and analysis of these data through bi-annual discussions at department Curriculum Committee meetings. The Committee forms a consensus regarding the validity of the analysis conducted by the faculty and discusses the improvement plans offered. Course and faculty evaluations are reported to the Program Director/Chair during annual faculty evaluations and are reported in aggregate, reviewed and discussed at the Annual Program Review (APR). Student evaluation of faculty/courses consistently meet Program benchmarks, **Appendix D**. WSU Graduate School Exit Survey data also demonstrate excellent faculty/course evaluations as compared to the CHP 3-year mean: faculty accessibility (100% vs. 97%), faculty feedback of course work (94% vs. 91%), quality of instruction (92% vs. 82%), and overall satisfaction with the Program (88% vs. 79%). The 3-year PA Program satisfaction with research advisor accessibility (91% vs. 94%), research advisor feedback on drafts (92% vs. 95%), and research advice on preparation of oral defense (94% vs. 96%) all meet previously established Program benchmarks to be no more than 3 percentage points below CHP 3-year mean. See **Appendix G** *Graduate School Exit Survey*.

Efforts to Recruit/Retain Faculty: The Program's 5-year faculty attrition rate is down and is now below the national mean (9.0% vs. 13.0% national average). Recognizing that high-quality staff support is necessary to retain faculty, staff was increased from two to three in 2014 with staff positions upgraded, and again increased from three to 3.5 in 2018 (3.4 national median).<sup>13</sup> Mean staff attrition over the last 5 years is 12.4%, nationally 12.0%.<sup>14</sup> Recognizing that heavy teaching, research, and administrative workloads contribute to faculty stress and low job satisfaction, the Program has made substantial changes in these areas. In 2019 (filled in 2020), a new 1.0 FTE position was created to share clinical year workload to focus on establishing new affiliation agreements and clinical sites as well as alumni relations necessary to support Program efforts to meet Accreditation standards. In June 2019, one 0.5 FTE faculty resigned and a second 0.5 FTE retired. One of those 0.5 FTE is expected to be filled by Aug 2020. The second 0.5 FTE position was converted to a 12-month 1.0 FTE, expected to be filled by Aug 2020. A new 10-month FTE was also created, expected to be filled by Aug 2020. This increases number of faculty from 8 to 9.5 bringing the Program in-line with national trends and supporting Program efforts to meet Accreditation standards. Due to the high turnover in the role of Department Chair/Program Director, beginning Jun 2020 that position was split between two faculty who will have reduced teaching loads in order to take on those additional responsibilities. The PA Program has an established faculty development fund that provides annual support to each faculty member for ongoing continuing education and certification maintenance needs.

---

<sup>13</sup> Physician Assistant Educator Association (PAEA). *By the Numbers: Program Report 34 (2018 Data)*. Oct 2019.

<sup>14</sup> Physician Assistant Educator Association (PAEA). *By the Numbers: Program Report 34 (2018 Data)*. Oct 2019.

Succession Plans: Extensive efforts have been supported by the Program, College, and University to recruit and retain a holistic and dynamic faculty team. Academic interests and professional goals are reviewed annually. Faculty are expected to and do actively participate in Program and College committees; University-level involvement is strongly encouraged. The diverse involvement of faculty within the College, University, and community creates opportunities for cross-training and professional development in PA education and administration. Minimum criteria for all new hires was increased from Bachelor to Master degree with an increased expectation to engage in scholarly activity. Mentoring for these new faculty will be enhanced. Finally, the Program maintains strong bonds to regional and state medical communities. Through a robust program of clinically practicing PAs volunteering with the Program as guest lecturers and clinical preceptors, we are able to identify a pipeline of potential faculty and/or administrative successors as need arises.

### Part 3: Academic Program(s) and Emphases

Analyze the quality of the program as assessed by its curriculum and impact on students for each program (if more than one). Attach updated program assessment plan(s) as an appendix (refer to instructions in the WSU Program Review document for more information). **See Appendix C – Program Self-Assessment Policy**

---

#### A. Undergraduate programs: Not Applicable

1. Please review Table 8 provided by the Office of Planning and Analysis. Is the program ACT below 20 (triggered by KBOR defined Minima)?  Yes  No

If yes, please explain the average ACT scores for your students.

#### B. Graduate programs:

1. Please review Table 9 provided by the Office of Planning and Analysis. Is the program GPA below the university average?  Yes  No

If yes, please explain the average GPA of your graduate students.

#### C. Accreditation status: If accreditation is previously noted, please add:

Accrediting Body: The Accreditation Review Commission on Education for Physician Assistants (ARC-PA)

Next Review Date: March 2021

Commendations and concerns from the last review:

In Mar 2018, the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) placed the WSU PA Program on Accreditation-Probation status. The basis for the decision was the information contained in the Program application and appendices submitted to ARC-PA on Aug 2017, the report of the site visit team (site visit Oct 2017), the Program response and accreditation history (first accredited Nov

1973). During the Program review, ARC-PA noted nineteen (19) areas of noncompliance with the Standards and the PA Program failed to demonstrate the following at the time of the site visit:

1. Supervised clinical practice experiences (SCPEs) enable each student to meet program expectations and acquire the competencies needed for entry into clinical PA practice.
2. The PA Program uses data collection and analysis to guide program modifications.

Required reports detailing Program responses to citations were submitted in a timely manner: Report #1 – submitted Jun 5, 2018; Report #2 – submitted Jun 29, 2018; Follow-Up Report – submitted Nov 16, 2018; and Report #3 – submitted Aug 15, 2019. An ARC-PA focused probation site visit occurred Oct 7-8, 2019 prior to the Mar 2020 ARC-PA Commission meeting. During the meeting, the Commission extended Accreditation-Probation status. At that time, ARC-PA noted five (5) areas of noncompliance. Based on information contained in the Program’s application and appendices submitted to ARC-PA, the report of the site visit team and the Program’s response to the site visit team observations, the Program failed to demonstrate compliance with the following standards: SCPEs should occur with preceptors practicing in: internal medicine; pediatrics; women’s health; and behavioral health care. Additionally, ARC-PA found the Program did not prepare a self-study report that accurately and succinctly documented faculty evaluation of the administrative aspects of the program. Required reports detailing Program responses to citations will be submitted in a timely manner: Report #1 – due Dec 1, 2020; Report #2 – due Aug 2, 2021. A focused probation site visit will occur in Oct 2021 prior to the Mar 2022 Commission meeting. This visit will evaluate the Program and institutional progress in addressing specific citations identified during the course of the most recent Program review.

#### *D. Assessment of Learning Outcomes*

1. Complete the table below with program level data. Identify the principal learning outcomes (i.e., with what skills does your Program expect students to graduate) and provide aggregate data on how students are meeting those outcomes

*You may add an appendix to provide more explanation/details. (If specialty accreditation has been conferred within 18 months of this process, programs can append the information from the accreditation document to this self-study and cite, with page number, the appropriate information. If specialty accreditation has not been affirmed within 18 months, please complete the table or submit an updated version of your accreditation information. If not accredited, please complete the table below.)*

All Program learning outcomes are based upon the NCCPA Core Competencies for the PA Professions. These measurable learning outcomes are aligned with NCCPA Core Competencies for the PA Professions. **Appendix E Learning Outcomes Curriculum Assessment Crosswalk** links these six principal competency areas including the 23 individual learning outcomes with curricular components used to gain each competency and the assessment tool for each learning outcome. **Appendix F Assessment of Learning Outcomes, Result, and Analyses** provides a description of the assessment tool, remediation process for that assessment, individual student criterion/targets, program criterion/targets, results, and analyses.

2. Provide an analysis and evaluation of the data by learner outcome with proposed actions based on the results listed in Table 2. Data should relate to the goals and objectives of the program as listed in Part 1.

Table 1 Student Learning Outcomes Comparison

| Learner Outcomes (licensing/certification exam pass-rates) by year, for the last 3 years |    |              |                |                      |
|------------------------------------------------------------------------------------------|----|--------------|----------------|----------------------|
| Year                                                                                     | N  | Name of Exam | Program Result | National Comparison± |
| Class of 2017                                                                            | 46 | PANCE        | 100%           | 97%                  |
| Class of 2018                                                                            | 49 | PANCE        | 100%           | 98%                  |
| Class of 2019                                                                            | 46 | PANCE        | 100%           | 93%                  |

PANCE = Physician Assistant National Certifying Examination (National Board Exams)

The Program 5-year PANCE average is 100% with a student attrition lower than the national average. Not only is the Program pass rate above the national average, but so are the vast majority of content and task areas. See **Appendix H** for detailed breakdown of PANCE performance within each content and task area. This provides strong indications of the WSU PA Program’s excellence and effectiveness in ongoing self-assessment and adjustment as demonstrated within the results and analysis columns of **Appendix F**.

### E. Assessment of Student Satisfaction

- Use Table 3 and OPA Table 10 to provide analysis and evaluation using student majors’ satisfaction (e.g., exit surveys from the Office of Planning and Analysis), capstone results, licensing or certification examination results (if applicable), employer surveys or other such data that indicate student satisfaction with the program and whether students are learning the curriculum (for learner outcomes, data should relate to the outcomes of the program as listed in 3d) to illustrate student satisfaction with the program and perceptions of program value.

Student satisfaction data from the WSU Graduate Exit Survey are reported in **Appendix G**. The 5-year average (2014-2018) percentage of students satisfied with the Program (**85%**) is similar to the University (84%) and higher than for the College (80%). The Program’s Vision/Mission Exit Survey (**Appendix D**) also indicates graduates are highly satisfied with the Programs ability to meet it’s guiding principles (all indices ≥ 85% satisfied). Not reported in Appendix D, this exit survey also indicates that **98%** of graduates believe the Program meets its vision of “Excellence in PA Education” and **96%** believe the Program meets its mission of “Transforming students into highly competent PAs.”

### F. General Education

- Does your program support the university General Education program?  Yes  No  
If yes, please complete the table below by listing the general education courses and noting which of the general education outcomes are addressed in the class. If no, skip this question.
- Use Table 4 to further explain which goals of the *WSU General Education Program* are assessed in undergraduate programs (optional for graduate programs) and the results. **Not Applicable**

### G. Concurrent Enrollment

1. Does the program offer concurrent enrollment courses?  Yes  No

If yes, provide the assessment of such courses over the last three years (disaggregated by each year) that assures grading standards (e.g., papers, portfolios, quizzes, labs, etc.) course management, instructional delivery, and content meet or exceed those in regular on-campus sections.

If no, skip to next question.

### H. Credit Hours Definition

1. Does the Program assign credit hours to courses according to Wichita State University Policy 2.18?

Yes  No If no, provide explanation.

### I. Overall Assessment

1. Define the overall quality of the academic program based on the above information and other information you may collect, including outstanding student work (e.g., outstanding scholarship, inductions into honor organizations, publications, special awards, academic scholarships, student recruitment and retention).

As previously discussed, the WSU PA Program uses a systematic and robust ongoing self-assessment process to review quality and effectiveness of educational practices, policies, and outcomes within the context of the University, College, and Program vision/mission and guiding principles. Self-assessment is an ongoing process designed to identify programmatic strengths/weaknesses and implement continuous quality improvement plans. See *Program Self-Assessment Policy/Procedure*, **Appendix C**. Overall, faculty demonstrate excellence within teaching and service. Although the rigors of the Program are high, overall student/graduate satisfaction is also high, national PANCE performance is excellent (100% 5-year first-time pass rate), and student attrition is low (4%). As demonstrated in **Appendix E**, learning outcomes are cross walked with both didactic and experiential learning curricular components and a wide variety of subjective and objective assessments are used to evaluate those learning outcomes. As demonstrated in **Appendix F**, appropriate student and Program targets / benchmarks have been established and are carefully monitored and analyzed over time for trends. When potential issues are identified, a quality improvement plan is developed, implemented, and then outcomes are reassessed. Graduates are well-prepared upon graduation with strong potential for employment.

## Part 4: Student Need and Employer Demand

Analyze the student need and employer demand for the program/certificate. Complete for each program if appropriate (refer to instructions in the WSU Program Review document for more information on completing this section).

---

Complete the table below.

| <i>Table 2 Employment of Majors</i> |             |                         |                             |                                     |                                  |                                                 |                                              |
|-------------------------------------|-------------|-------------------------|-----------------------------|-------------------------------------|----------------------------------|-------------------------------------------------|----------------------------------------------|
|                                     | Avg. Salary | Employment In state (%) | Employment in the field (%) | Employment related to the field (%) | Employment outside the field (%) | Pursuing graduate or professional education (N) | Projected growth from BLS**                  |
| 2019                                | \$97,497    | 96%                     | 100%                        | –                                   | –                                | NA                                              | 37% projected growth over the next 10 years* |

\* [https://ksdegreestats.org/program\\_search.jsp](https://ksdegreestats.org/program_search.jsp) and U.S. Bureau of Labor Statistics Website: <http://www.bls.gov/oco/> are good resources to view job outlook data and salary information (if the Program has information available from professional associations or alumni surveys, enter that data)

*A. Provide a brief assessment of student need and demand using the data from Tables 11-15 from the Office of Planning and Analysis and from the table above. Include the most common types of positions, in terms of employment graduates can expect to find. Also address students enrollment, degree production and employment outcomes for diverse students.*

Student demand for the Program remains extremely high, with on average 1,151 verified applicants annually. Typically about 700 to 800 of these applicants are qualified for admission. Typically 150 applicants are interviewed annually, with 48 selected for admission. The typical WSU PA student graduates with about half the amount of student loan debt as compared to the national average for PA students,<sup>15,16</sup> and starting salaries for our graduates are highly competitive. By the time WSU PA students graduate, **88%** have already accepted employment offers or have multiple offers to consider. There is no difference in rate of employment for diverse students.

The 5-year rolling average percent of URM enrolled in Master’s programs is 10.5% at the University-level; 11.4% at the CHP-level; and 4.5% at the Program-level. With an understanding that PAs with a wider set of experiences and perspectives will likely have increased ability to understand current healthcare disparities and identify innovative ways of delivering more equitable care, the importance of diversity within the student body is recognized and supported by the Program. Nationwide, the proportion of URM PAs and PA faculty has decreased over the past 3 decades. As supported by research and best practice recommendations, the Program utilizes a holistic approach for the admission process that looks beyond GPA and standardized test scores, allowing for a more individualized review of applicants.<sup>17</sup> The Program does not require the GRE which has been implicated in reducing recruitment of URM students and the Program awards additional admission points to applicants who are veterans, economically disadvantaged, first-generation, and fluent in URM languages.

<sup>15</sup> Wichita State University Graduate School Exit Survey Data. 2017-2019, most recent available.

<sup>16</sup> Physician Assistant Education Assoc (PAEA). *PAEA By the Numbers, Student Report 2*. Data from the 2017 End of Program Survey.

<sup>17</sup> DiBaise M, Salisbury H, Hertelendy A, Muma RD. Strategies and perceived barriers to recruitment of underrepresented minority students in physician assistant programs. *J Physician Assist Educ* 2016;26(1):19-27.

## Part 5: Program Service

Analyze the service the Program/certificate provides to the **discipline, other programs at the University, and beyond**. Complete for each program if appropriate. **Data tables 1, 2, 3 and 5a, b and c provided by the Office of Planning Analysis (covering SCH by FY and fall census day, instructional faculty; instructional FTE employed; program majors; and degree production) can be used to partially address this section.** (Refer to instructions in the *WSU Program Review* document for more information on completing this section).

---

### *A. Provide a brief assessment of the service the Program provides using SCH by majors and non-majors.*

As a lock-step curriculum, non-majors are not allowed to take courses with the PA pre-fix. However, several HS and HP courses taught through and by PA Program faculty are used as requirements and electives within other graduate programs. DPT 755 Pharmacology for Physical Therapy is a 2 credit hour course taught each summer as a required course for the Doctor of Physical Therapy degree (~80 SCH for DPT annually). HS710 and HS711 are both 3 credit hour pharmacology courses taught sequentially each fall and spring as required courses for MPA and Doctor of Nurse Practitioner degrees (~24 SCH for DNP annually). HP800 is a 2 credit-hour all online course taught each fall and spring through and serves as a requirement for the MPA and Masters of Aging Studies degree as well as an elective for the graduate-level CSD degrees (~34 SCH for CSD and AGE annually). HP801 Interprofessional Evidence-Based Practice is the only graduate-level interprofessional course within the CHP. This 1 credit hour course is co-taught by faculty from PA and CSD (speech language pathology and audiology faculty) and is a required course for PA, CSD, and AGE students (~32 SCH annually for CSD and AGE combined).

### *B. Provide a brief assessment of the service the Program/certificate provides to other university programs.*

All Program faculty actively participate in Program-level service and at least one College-level committee. Most also provide University-level service as well. Program faculty highly value collaborative, interprofessional scholarship and often involve students in this type of work. On average, nearly 30% of the MPA student projects over the last 5 years have been interprofessional, reaching across the College and into the community. This provides those CHP faculty outside the Program with graduate students to assist in their research making that research more feasible.

Interprofessional education is required by all of the CHP program accrediting bodies; therefore faculty across CHP must work collaboratively to develop and oversee a variety of interprofessional education activities, see **Appendix I**. These activities not only include other CHP programs but also Newman University and the Schools of Medicine and Pharmacy at KU-Wichita. All PA faculty serve as liaisons and co-developers for various interprofessional activities. These activities typically do not fall within any course and are not reflected in the faculty member's teaching load.

*C. Provide a brief assessment of the service the Program/Certificate provides to the institution and beyond.*

Faculty are involved within their professional organizations at the state and national levels taking on a variety of leadership roles. Examples include providing clinical volunteer services at a local indigent care clinic, pregnancy crisis center, consultant for development of the first PA program in the country of Myanmar, Sedgwick County Fetal Infant Mortality Review committee, and others. PA faculty also provide continuing education presentations and refereed poster presentations at the state or national level. All PA faculty serve as liaisons and co-developers for various service-learning activities involving a variety of community partners, see **Appendix B**. These activities typically do not fall within any course and are not reflected in the faculty member's teaching load.

## Part 6: Graduate Enrollment Management (GEM)

*For each graduate program, summarize and reflect on the progress you have made toward your GEM plan following the (a)-(d) template.*

---

*A. Briefly summarize the GEM plan, paying particular attention to the vision, actions, and GEM evaluation.*

In alignment with the vision and mission of the College, Graduate School, and University, the PA GEM plan outlines five primary goals:

1. Maintain a comprehensive and equitable admissions process seeking applicants with qualities consistent with the Program's Guiding Principles while adhering to fair practices, preserving transparency, and maximizing student diversity consistent with ARC-PA standards.
2. Adequately support the PA Department Director of Admissions throughout the application process from opening of CASPA to matriculation of students. In order to maintain a realistic workload for the Director of Admissions with a consistently large pool of applicants to the PA program, it will be essential to explore innovative ways to continue with our holistic admissions model.
3. Remain as a competitive, first-choice program for prospective students in an environment of rapidly increasing demand and options by maintaining relevancy in PA/Medical Education. Increase local, regional, and national awareness of the WSU PA program through funded strategic recruitment efforts.
4. Continue utilization of CASPA and resources available through PAEA, as well as continued collaboration with the Graduate School in utilization of CollegNet.
5. Support continuation of collaborative PA student-faculty scholarship in accordance with the University's research mission. Provision of appropriate financial assistance for dissemination of information.

### Summary of Enrollment History over Past 5 Years:

| <u>CASPA Application Cycle</u> | <u># of Applicants</u> | <u>PA Class</u> | <u>Students Matriculated</u> | <u>Attrition</u> |
|--------------------------------|------------------------|-----------------|------------------------------|------------------|
| 2018-2019                      | 690 verified           | 2021            | 50                           | -4               |
| 2017-2018                      | 1019 verified          | 2020            | 48                           | -2               |
| 2016-2017                      | 745 verified           | 2019            | 48                           | -3               |
| 2015-2016                      | 1210 verified          | 2018            | 50                           | -1               |
| 2014-2015                      | 941 verified           | 2017            | 48                           | -2               |

*B. Discuss how graduate assistantships are being used to advance the GEM goals.*

Not Applicable; graduate assistantships and graduate investments have not been utilized by the Program.

*C. Provide an assessment of successes, challenges, deficiencies with the GEM plan.*

1. Goal 1: At the 2020 Annual Program Review, PA faculty/staff, Aaron Coffey, Assistant Dean GEM/Director of Graduate Admissions and Mandy Konecny, Director of CHP Advising extensively reviewed and analyzed the Program's application demographic data and admissions processes within the context of ARC-PA Standards, standards for fair admissions practices and transparency, SEM Plan and GEM Plan. Suggested revisions were subsequently reviewed and approved as appropriate during Department faculty meetings.
2. Goal 2: The Program has successfully streamlined roles and responsibilities of the Director of Admissions to maximize efficiency in workload and improve overall job satisfaction. The Program was not successful in its request for a Graduate Staff Assistant to provide objective initial screening of applicant qualifications; further develop capabilities of WebAdMIT and facilitate transition from CollegeNet to Slate; provide statistical analysis of applicant pool data; and continue to develop and refine the Program's rubric for scoring applicant performance against an identified set of criteria. Therefore, the Graduate School Coordinator role has been expanded to include these duties under the title of Graduate Admissions Coordinator.
3. Goal 3: Beginning June 2020, the newly approved position of Director of Clinical Development and Operations will be responsible for marketing and promotion of the WSU PA Program through written, oral, in-person, and social media platforms. In order to remain a relevant and first-choice Program, the PA Program will investigate the feasibility of becoming the nation's first entry-level doctoral PA Program and/or one of the nation's first dual degree Master's/Doctoral programs.
4. Goal 4: The PA Program continues to utilize CASPA and resources available through PAEA, as well as collaborates with the Graduate School in utilization of CollegNet for Program admissions. When the Graduate School announced use of CollegeNet would cease in Aug 2020 and transition to Slate, the PA Program volunteered to be a pilot program to facilitate integration of Slate into the admissions processes. The current PA admissions cycle opened in Apr 2020 and will close in Sep 2020. Slate was not ready to be deployed in Apr with PA as a focused pilot program. Therefore, the transition from CollegeNet to Slate will likely be delayed until the next admission cycle to minimize disruption to the current process and confusion to the applicants.
5. Goal 5: In accordance with the University research mission, the Program continues to support collaborative PA student-faculty scholarship with 22% of student projects presented as professional state/national poster presentations or publications. Three new faculty positions were all hired in at the Master's level with increased emphasis within the position descriptions related to scholarship. All faculty will receive formalized mentoring with regards to scholarship.

*D. Summarize how the GEM plan is being updated going forward based on the findings above.*

The PA GEM plan will continue to be reviewed on an annual basis with revisions as appropriate. Additional collaboration with the Graduate School will be critical for moving forward on several goals of the GEM plan including transitioning part of the PA admission process from CollegeNet to Slate; providing support for increasing university requirements relevant to admission and program data analysis; and development of infrastructure to support faculty research efforts at a level consistent with university expectations.

## Part 7: Undergraduate Enrollment Management

*For each undergraduate program, summarize and reflect on the progress you have made toward your colleges enrollment goals. Not Applicable*

---

- A. Briefly describe how the department and faculty have engaged in undergraduate strategic enrollment management including both recruitment and retention initiatives and activities.*
- B. Provide an assessment of successes, challenges, and deficiencies with departmental activities.*

## Part 8: Impact of Previous Self-Study Recommendations

At the conclusion of the last program self-study performed, the committee provided recommendations for improvement for the department. Please list those recommendations and note your progress to date on implementation.

Complete the table.

*Table 3 Changes made based on Previous Recommendations*

| Recommendation                                                                                 | Activity                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                         | Outcome                                                                                                                                              |
|------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------|
| Increase scholarly production in terms of journal articles, presentations, and external grants | Two national grants were sought:<br>1) Expansion of Practitioner Educ-Physician Assistant (PRAC-ED-PA) and<br>2) PAEA Substance Use Disorder Curriculum, supported by Substance Abuse and Mental Health Services Administration Grant No. FG-19-001.                                                                                                                                                                                                                                                                                                                                                                                                             | The overall rate of scholarly production remained steady but did not demonstrate a significant increase. Both grants were awarded, totaling \$10,000 |
| Consider incorporating the UNISCOPE model into assessment of scholarship                       | All PA faculty now incorporate UNISCOPE within FAR documentation. One faculty member sought promotion in the new CHP clinical track                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              | Promotion was successful                                                                                                                             |
| Align recruitment and retention efforts with the University's SEM Plan and GEM Plan            | SEM Goal 11 strives to increase enrollment of domestic and international graduate students. While ARC-PA caps Program enrollment at 48, the Program remains actively involved in recruitment and retention efforts. Examples include: educational events with state high school students (Wichita West High School; Dodge City High School); active participation in University sponsored recruitment events (Black & Yellow Days; CHP Living Learning Community dinner; Distinguished Scholarship Invitational); presentations provided to pre-PA student organizations (WSU; KSU; UMKC; Baker Univ), and UG advising departments at WSU and other institutions | With capped enrollment, growth cannot be demonstrated.                                                                                               |

## Part 9: Program Goals from Last Review

Report on the Program's/certificate's goal (s) from the last review. List the goal(s), data that may have been collected to support the goal, and the outcome. Complete for each program if appropriate (refer to instructions in the WSU Program Review document for more information on completing this section).

Complete the table.

Table 4 Results of Goals from Last Review

| Goal(s)                                                                                                                                                                                                                                                                                              | Assessment Data Analyzed                                                                                                                                                                                                                                                                | Outcome                                                                                                                                                                                                                     | Status (Continue, Replace, Complete) |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------|
| Complete evaluation of ARC-PA review of the WSU PA Program Self Study Review (SSR) previously submitted 11/2015.                                                                                                                                                                                     | Report completed and submitted Aug 2017.                                                                                                                                                                                                                                                | The Program appropriately addressed feedback on the vast majority of citations. Outcomes detailed in Part 3C: Accreditation Status of report.                                                                               | Complete                             |
| The research curriculum will be holistically evaluated for ongoing relevancy by faculty, community, and CHP and University stakeholders. Evaluation will focus on research expectations for PA faculty, CHP/University goals, and student learning outcomes.                                         | Students became adept in critical evaluation of the literature, case presentation, and information literacy. In 2018, 1 student presented a case report at GRASP; in 2019, 4 students presented at GRASP; in 2020, 6 students presented at GRASP with one taking 3 <sup>rd</sup> place. | As an alternative to a traditional research project, an alternate evidence-based medicine research track was piloted AY 2017-2018. The EBM track was successful in meeting Program learning outcomes and will be continued. | Complete                             |
| Development of a PA Program Advisory Committee and recruitment of engaged members from the medical community. The purpose will be to offer advice and consultation to the Program on issues, plans, policies, and procedures that affect the future of the Program, PA education, and PA profession. | NA                                                                                                                                                                                                                                                                                      | This goal was deferred in December 2018 at which time focus was shifted to immediate Program needs with a primary focus on accreditation requirements.                                                                      | Replace                              |
| Development of strategic plan for future recruitment and retention of clinical rotation sites and preceptors in accordance with ARC-PA Standards. The plan will explore options for community collaborations. Possible incentives for recruitment of clinical preceptors will be identified.         | Strategic plan was developed but only partially implemented due to limited resources and institutional support. Efforts did not result in adequate increases in clinical sites and preceptors; thus the Program remains on probation.                                                   | The Program remains on probation for citations within this area. A new Affiliate Clinical Preceptor status created 2019. Dir of Clinical Development and Operations position approved Fall 2019 and filled June 2020.       | Continue                             |

| Goal(s)                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                | Assessment Data Analyzed                                                                                                                                                                                                                                                                                                                                                    | Outcome                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 | Status<br>(Continue,<br>Replace,<br>Complete) |
|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-----------------------------------------------|
| <p>Conduct assessment of Program Admissions policies and procedures to insure a fair and transparent admission system for all applicants in full compliance with the <i>Fair Admissions to Higher Education: Recommendations for Good Practice</i>. Seeking input from the WSU Tilford Commission, the goal is to ensure a holistic approach for the admission process that maximizes student diversity. In order to meet the workload requirement for processing the growing number of Program applications, utilization of the CASPA system will be evaluated for improved efficiencies and enrollment efforts will be coordinated with the WSU Graduate School.</p> | <p>PA faculty/staff, Aaron Coffey, Assistant Dean GEM/Director of Graduate Admissions and Mandy Konecny, Director of CHP Advising extensively reviewed and analyzed the Program's application demographic data and admissions processes within the context of ARC-PA Standards, standards for fair admissions practices and transparency, SEM Plan and GEM Plan (2020).</p> | <p>Policies/procedures updated; feedback documents revised; transparency informational document created for website (Jul 2017).</p> <p>Program Director and Director of Admissions attended CASPA workshops in 2017 and 2018.</p> <p>New Director of Admissions hired in 2018 and completed CASPA and WebADMIT training online and in person 2018-2019.</p> <p>Coordinator of Graduate Admission position created to provide additional support and data analysis to the Dir of Admissions (Jun 2020).</p> <p>After the 2020 holistic analysis, suggested revisions were developed and implemented.</p> | <p>Complete</p>                               |

## Part 10: Forward-facing Goals

Identify goal(s) for the Program to accomplish in time for the next review. Goals must be **Specific, Measurable, Attainable, Realistic and Time-bound (SMART)** and should be tied to the university and college strategic plans.

Complete the table.

*Table 5 Forward Facing Goals for Program Review Period*

| Program/Certificate Goal                                                                                                                                                      | Specific                                                          | Measurable                                                                                            | Attainable                                                                                                                                                | Realistic                                                                                                                          | Time-bound                                                                     |
|-------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|-------------------------------------------------------------------|-------------------------------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------|------------------------------------------------------------------------------------------------------------------------------------|--------------------------------------------------------------------------------|
| Program will be fully Accredited with probationary status removed                                                                                                             | Yes – ARC-PA Accreditation status                                 | Yes – ARC-PA Accreditation status                                                                     | Yes – Program is now receiving good support from CHP & WSU administration                                                                                 | Yes – Full accreditation at next review is required for Prog continuation                                                          | Yes – March 2022                                                               |
| Increase number of supervised clinical practice experiences (SCPEs) within the required rotation types (Women’s Health, Behavioral Health, Internal Medicine, and Pediatrics) | Yes – SCPE types: WH, BH, IM, & Peds                              | Yes – Number of each type of SCPE & % of students receiving required SCPEs                            | Yes – New position approved & filled for Dir. Clinical Development & Operations                                                                           | Yes – This is an Accreditation requirement                                                                                         | Yes – December 2021                                                            |
| Investigate feasibility of transitioning to an entry-level doctoral program and/or dual-degree doctoral program                                                               | Yes – Written proposal developed                                  | Yes – Written proposal developed                                                                      | Yes – All faculty have a terminal degree (Master’s); faculty development funds can partially support faculty tuition to obtain necessary doctoral degrees | Yes – As one of the oldest programs in the nation and a long history of academic excellence, the WSU PA Program is well-positioned | Yes – This is not a required element for Program continuation or Accreditation |
| Increase involvement of all faculty in the area of scholarship (journal publications, presentations, grants)                                                                  | Yes – Scholarship as defined traditionally and via UNISCOPE model | Yes – Number pubs, presentations, grants; % faculty participating in scholarship or research training | Yes – Faculty development funds; focused mentoring and training                                                                                           | Yes – Faculty roles & annual goals will be expected to include scholarly expectations                                              | No –                                                                           |

Provide any additional narrative covering areas not yet addressed.

## 2019 PA Program Tuition & Cost Comparison Table

| Program                                               | State     | Resident Tuition | Non-Resident Tuition | Program Length | Credit Hours | Class Size | 5-year PANCE Pass Rate |
|-------------------------------------------------------|-----------|------------------|----------------------|----------------|--------------|------------|------------------------|
| University of North Texas Health Sci Center Ft. Worth | TX        | \$35,164         | \$93,532             | 30             | 125          | 75         | 100%                   |
| University of North Dakota                            | ND        | \$37,736         | \$54,741             | 24             | 90           | 30         | 93%                    |

The following pages describe several faculty-led initiatives within which our students participated. In addition to these activities, every year our students leave their mark by taking the initiative to develop their own opportunities to engage with and support the community.

## Ready Set Fit! Program

The Ready Set Fit! program is a national initiative endorsed by the American Academy of Family Physicians, Americans in Motion (AIM). WSU PA students volunteer to provide 3<sup>rd</sup> and 4<sup>th</sup> grade students with upbeat and interactive discussion regarding being active, eating smart, and feeling good as well as providing the children with information about the PA profession.

## Medical Mission at Home

Sponsored by Via Christi, this is a one-day free event held each spring designed to improve the health of individuals and the community. The event offers free medical care, medical testing, screenings for dental, vision, & hearing, foot care, community services, and connections to follow-up care. Students assist at various stations related to their discipline.

## PA Community Service Day

PA students self-organized a community service day to include visiting veterans at the Dole VA Center, delivering Meals on Wheels, assisting families receiving a 2 month supply of groceries from the Salvation Army, working in the United Way warehouse to prepare office supplies and household items for distribution to non-profit organizations and working with the United Methodist Open Door to create T-shirt backpacks, snack packs, and organize hygiene products. This day was an absolute success and with the help of our wonderful community partners, we hope to make this an annual event in the future!

## Senior Saturdays at Larksfield Place

This was a series of volunteer sessions offered at Regent Park Rehabilitation and Healthcare through the WSU Community Service Board. Students had the opportunity to interact with older adults by providing companionship, playing games, sharing conversation, and just hanging out.

## West High School Presentations

For the past several years, WSU PA students have been giving presentations on Healthy People topics to West High School students, enrolled in the health professions track of study. Topics include tobacco use, substance abuse, mental health, responsible sexual behavior, physical activity, obesity, injury & violence, environmental quality, immunizations, and access to healthcare. West High school has many students who live in poor socioeconomic conditions. This is an opportunity for dialogue between High School students and PA students about important health issues as well as an opportunity for PA students to share information about the profession and how one becomes a PA.

## KIDS Network Community Baby Shower

This event allows students to interact with low-income expectant parents, their support people, and community service providers to put on an educational “baby shower.” At the shower, participants learn about infant safe sleep and maternal child health in order to improve health and infant birth outcomes. Our students interact with expectant mothers and assist in various duties (loading cribs, acting as guides, etc.). The event is held in a zip code identified as having a higher risk of infant death than the surrounding area.

## Student-Initiated Service Learning Activities

Blood Donations  
Bowl for Kids’ Sake – Big Brothers Big Sisters  
Catholic Charities Food Pantry  
Down’s Syndrome Society of Wichita  
Foodbank Friday  
ICT SOS – Fresh Start Bags  
ICT SOS Race for Freedom  
Purple Mile Walk Domestic Abuse Awareness  
Interfaith Ministries Holiday Warehouse  
Lifecare Center Bingo  
Lord’s Diner  
Operation Holiday  
People’s Health Clinic Volunteer  
Relay for Life  
Ronald McDonald House  
Salvation Army Angel Tree  
St. Catherine’s Health Fair  
Suitcases for Haiti

Toys for Tots  
Trunk or Treat  
Urban League Tutoring  
Victory in the Valley  
Walk to End Alzheimer’s  
Wellsville Retirement Community  
Wichita’s Littlest Heroes

## Program Self-Assessment Policy/Procedures

Date of Inception: 06/14

Reviewed: 08/18; 09/18

Revised: 05/17, 8/19

**Overview:** The WSU PA Program uses a systematic and robust ongoing self-assessment process to review the quality and effectiveness of its educational practices, policies, and outcomes. This process is conducted within the context of the WSU, College of Health Professions, and Program, mission, vision, and guiding principles. Self-assessment is not a one-time event, but an ongoing process critically assessing key aspects of the Program relating to sponsorship, resources, students, operational policies, curriculum and clinical sites using the Accreditation Review Commission on Education for the Physician Assistant (ARC-PA) *Accreditation Standards for PA Education* as point of reference. The goal of ongoing self-assessment is to identify programmatic strengths/weaknesses and implement continuous quality improvement plans. <sup>[Section C: Introduction]</sup>

### Philosophy of Data Collection/Assessment

A plethora of data can be generated from PA Manager, surveys, evaluations, reports, and other sources. Data can quickly become overwhelming causing important and meaningful information to be lost among the clutter. Also, knee-jerk reactions to a single set of data or from inaccurate interpretation/analysis can result in poor decision-making. Therefore, when deciding what to collect/analyze or how to report or interpret results, self-assessment criteria for ARC-PA and WSU as well as the following principles from the *American Association for Higher Education and Accreditation* should be followed:

1. **Assessment of student learning begins with identification of educational values.** Assessment is not an end in itself, but a *vehicle for educational improvement*. Educational values should drive what we choose to assess, rather than measuring what's easy to collect.
2. **Assessment is most effective when it reflects an understanding of learning as multidimensional, integrated, and revealed over time through performance.** Assessment should include a diverse array of methods including those that call for actual performance and tracing that performance over time as the student's knowledge, abilities, values, and attitudes develop.
3. **Clear, shared, implementable goals are the cornerstone for assessment that is focused and useful.**
4. **Assessment requires attention to outcomes but also and equally to the experiences that lead to those outcomes.** Where students "end up" matters greatly, but to improve outcomes, we need to know about student experiences along the way (curriculum, teaching, student effort).
5. **Assessment works best when it is ongoing, not episodic.** Assessment is a process whose power is cumulative. Improvement is best fostered when assessment entails a linked series of activities undertaken over time.
6. **Assessment fosters wider improvement when representatives from across the educational community are involved.** Assessment is not a task for small groups of experts but a collaborative activity; its aim is wider, better-informed attention to student learning by all parties with a stake in its improvement.
7. **Assessment makes a difference when it begins with important issues and illuminates questions that people really care about.** Data collected must be connected to issues or questions [*actual decisions points*] that people really care about. This means thinking in advance about how the information will be used and by whom. The point of assessment is not to gather data and return "results."
8. **Assessment is most likely to lead to improvement when it is part of a larger set of conditions that promote change.** Assessment is more valuable when the quality of teaching and learning is visibly valued and worked at. Information about learning outcomes should be an integral part of decision making, and avidly sought.
9. **Through assessment, educators meet responsibilities to students and to the public.** As educators, we have a responsibility to the public that support or depend on us to provide information about how our students meet goals and expectations. But that responsibility goes beyond the reporting of such information; our deeper obligation – to ourselves, our students, and society – is to improve.

*Principles 1 – 9 were abbreviated from the Am Assoc for Higher Educ & Accreditation*

## Reporting / Analysis of Quantitative Data

For consistency in data reporting and analysis, quantitative data are typically reported as means and/or percentages as appropriate. A measurement of variation (standard deviation or range) should be provided with the mean. When statistical analysis is conducted, either parametric or non-parametric tests should be used, as appropriate. When correlational statistical tests are used, correlation coefficients are defined as negligible (0 to 0.19), weak (0.2 to 0.39), moderate (0.4 to 0.59), or strong (0.6 to 1). Quantitative data should be tracked and trended over time and monitored for outcomes below established benchmarks, demonstrating a downward trend, or demonstrating significant fluctuations.

## Analysis / Reporting of Qualitative Data

Qualitative data are used to gain an understanding of underlying reasons, opinions, and motivations. They can provide insights into the “whys” behind quantitative data and uncover trends in thought and opinions which allow deeper data analysis. Qualitative data can be collected through unstructured or semi-structured techniques (e.g. surveys, focus groups, individual discussions). Although not possible for all types of qualitative data, for consistency in data reporting and analysis, qualitative data should be quantified whenever possible.

Survey data gathering attitudes, beliefs and opinions are also considered qualitative data (e.g. student evaluations of preceptors, faculty, courses and exit survey data). For consistency in data collection, the Program will typically use a 5-point Likert scale: (5) Strongly Agree, (4) Agree, (3) Neutral, (2) Disagree, and (1) Strongly Disagree. Likert scale data are typically reported as a sum of Strongly Agree + Agree responses. The data mean may also be provided for descriptive purposes only. Measurement of variation is not necessary here, as these means are descriptive only. When statistical analysis is conducted with Likert scale data, they are to be analyzed using non-parametric tests. If the survey is a validated, reliable instrument, data may be analyzed using parametric tests. Response rate should be reported for all survey data.

Open-ended comments should also be quantified when possible. For consistency in data reporting and analysis, a simple thematic analysis should be conducted. The goal of a thematic analysis is to identify themes, i.e. patterns in the data that are important or interesting or help clarify the Likert-scale data. This is much more than simply summarizing the comments. A good thematic analysis interprets and makes sense of the data. A typical starting point is to search for positive vs. negative themes or strengths vs. weaknesses/areas for improvements. Student comments should also be coded and reported by content. For example, reporting and analysis of student perceptions of faculty may be coded and reported as...

***Strengths/Weaknesses related to stimulating student interest in course content...** Positive themes were related to real-life stories/case studies (8); excellent teacher/knowledgeable (5); study tools/organized material and lecture notes (4); appreciated critical thinking, application (3); dedicated/passionate about student learning/material (3); and made difficult material easy to understand (2). Negative themes were related to report as above (if none, state no negative comments were noted more than twice or something like that). Only positive/negative comments mentioned more than twice are coded and reported.*

***Strengths/Weaknesses related to establishing rapport with students...** Positive themes were related to the instructor’s dedication to helping students learn/encouraging students (6); good/timely feedback (4); and approachable/open-door policy (4). Negative themes were related to instructor being perceived as intimidating/unapproachable (11); feeling like the instructor was bothered by their questions (6); and not feeling comfortable asking questions (3). Only positive/negative comments mentioned more than twice are coded and reported.*

## Philosophy of Establishing Benchmarks

Benchmarking is an ongoing, systematic process for measuring and comparing the work processes of an organization to past performance of that organization and/or comparing one organization to another, by bringing an external focus to internal activities, functions, and operations. Benchmarking is a way of discovering gaps in processes and outcomes. The purpose of benchmarking is to communicate expectations, plan curriculum and instruction, monitor and evaluate learning, monitor and evaluate outcomes related to process changes, and predict future performance.

When possible and appropriate, the Program should use various quantitative benchmarks against which to measure performance. The Program uses two main types of benchmarking 1) internal benchmarking and 2) external benchmarking. Benchmarking should be an ongoing process; therefore, benchmarks are implemented, monitored, and adjusted when appropriate.

- 1) *Internal benchmarking* is done by assessing against past Program performance within that area as well as performance in similar areas/functions within the Program. This includes trending data over time, self-comparison through repeated measures, and correlations between internal data and outcomes such as PANCE scores.
- 2) *Eternal benchmarking* is done by calibrating Program benchmarks against the performance of others. Examples of external benchmarking include:
  - a. *Internal units* – comparisons within the University (e.g. comparisons with other WSU graduate programs or other WSU College of Health Professions programs)
  - b. *Similar programs* – comparisons with similar PA programs within universities identified as “peer institutions” via the University formal processes ([Appendix A](#)) and/or membership in the American Athletic Conference. Appropriate benchmarks include established programs of similar size and not affiliated with a medical school
  - c. *Functional comparisons* – comparisons across diverse settings (e.g. national data obtained from PAEA or AAPA or published data)

It is important to select a benchmark challenging enough to reflect the Program’s Vision of “Excellence in PA education” while balancing that with an understanding that striving for excellence is different than striving for perfection. Striving for perfection or unnecessarily lofty goals runs the risk of causing teams to lose sight of themselves and their purpose. Fluctuations in certain types of data are often normal and expected. For example, fluctuations are frequently seen with student satisfaction surveys from one cohort to the next or when a change occurs such as significant course revisions, new course instructors, or changes to policy or practice that might affect student satisfaction. Therefore, a single low rating may not be alarming especially if the reasons are understood and justifiable. In such cases, documentation of reasons for the low evaluations and plans for corrective actions are appropriate.

### Steps involved in benchmarking:

- 1) Determine what needs benchmarking by understanding the Program’s current processes, current performance gaps, and Accreditation requirements
- 2) Obtain support and approval from the assessment team (Program Director, Director of Assessment, Director of Didactic Education, and Director of Clinical Education)
- 3) Communicate benchmarks and expectations to involved parties (e.g. faculty, students, preceptors, administration)
- 4) Determine objectives and scope of benchmarking (e.g. track progress from present into the future, track outcomes after a change is made, identify negative trends, make comparisons with quality indicators)
- 5) Determine primary metrics to be used
- 6) Develop data collection plan
- 7) Disseminate results for discussion and analysis

*Adapted from Six Sigma Principles ([www.isixsigma.com](http://www.isixsigma.com)) and Benchmark Assessment for Improved Learning, an Assessment & Accountability Comprehensive Center (AACC) Policy brief*

### Typical Program Benchmarks:

Whenever possible and as appropriate, using similar benchmarks for similar types of data aids in consistency and transparency of benchmarks and expectations for all involved parties.

- 1) Required Elements: A typical benchmark for a required element of the Program would be a goal of 100%. Examples of required elements would be that 100% of students participate in service learning opportunities or 100% of full-time faculty are expected to have a terminal degree or a plan to obtain that degree.
- 2) University-Defined Benchmarks: When University-defined benchmarks are available and appropriate to use, the typical Program benchmark would be meet the University benchmark. Examples include benchmarks for tenure and promotion and student-to-faculty ratio.
- 3) Satisfaction Surveys: A typical Program benchmark for a satisfaction survey would be a goal of  $\geq 80\%$  satisfied. The appropriateness for this benchmark can be established by calibrating against past internal data for that individual data point (if available) and/or calibrating against similar Program satisfaction surveys or similar College or University surveys.
- 4) National Program Data: When national PA program data are available and appropriate to use, a typical benchmark would be a goal of at or above the national average for that data point. The most recent PAEA Annual Report is a reliable source of national and regional information. Benchmarking externally against national or regional PA programs rather than internal College or University data is more appropriate for things such as student attrition and faculty-to-student ratio considering the WSU PA Program far exceeds the minimum requirements of the WSU Graduate School which is simply to maintain a minimum 3.0 GPA.
- 5) Standardized Exam Performance: A typical Program benchmark for standardized exam performance would be goal of  $\geq 97\%$  of the national average – in other words, no more than 3 percentage points below the national average. The 3 percentage points below national average is appropriate considering the wide standard deviation for this type of data. The standard deviation is much wider than 3 percentage points, thus a benchmark of  $\geq 97\%$  of the national average is high but appropriate, considering past performance and our mission of “Excellence in PA education.”

---

### **Self-Assessment Roles/Responsibilities**

The Director of Assessment, under the supervision of the Program Director, is responsible for

- 1) developing policies/procedures regarding the Program’s self-assessment process,
- 2) creating a cycle and timeline for assessment activities,
- 3) coordinating involvement and support of faculty/staff within the department – providing opportunities for broad faculty involvement,
- 4) coordinating collection of evidence of student learning and compliance with *Accreditation Standards* and providing a structure for reporting of that evidence,
- 5) keeping assessment tools current, and
- 6) ensuring key outcomes are published.

Overseeing Program compliance and documentation of compliance with *Accreditation Standards* related to the didactic curriculum and curricular policies is the primary responsibility of the Director of Didactic Education; while compliance related to the clinical year and clinical year policies is the primary responsibility of the Director of Clinical Education; and compliance related to administrative aspects of the Program and administrative policies is the primary responsibility of the Program Director. All Program policies/procedures are reviewed annually prior to each new cohort of students and as needed.

## Essential Self-Assessment Reports

1. University Level Program Review
2. ARC-PA Self-Assessment Report
3. Annual Program Review (APR)
4. Annual Clinical Year Report (ACYR)

### 1. University Level Program Review<sup>[A1.03.a]</sup>

- a. This review meets WSU and Kansas Board of Regents (KBOR) requirements and is informed by the Annual Program Review.
- b. University level Program reviews are scheduled every 3 years according to the following schedule: 2017, 2020, 2023, 2026 and so forth.
- c. Related information including KBOR Program Review process, schedule for program reviews, instructions for completing review and templates are available on the WSU Assessment Home Page.
- d. Copies of past Program Reviews including individualized feedback for improvement<sup>[C1.01]</sup> and clarity of these Program Reviews can be found on the shared drive under: Q://Assessment Data/Program Reviews (WSU KBOR Reports) and on the WSU Assessment Home Page

### 2. ARC-PA Self-Assessment Report<sup>[C2.01]</sup>

- a. This report meets ARC-PA requirements and is informed by the Annual Program Review.
- b. ARC-PA Self-Assessment Reports are scheduled every 3 years according to the following schedule: 2017, 2020, 2023, and so forth.
- c. Related information including *Accreditation Standards* and Self-Assessment Templates can be found on the ARC-PA website.
- d. Copies of past accreditation reports and site visit feedback can be found on the shared drive under the “Accreditation” folder.

### 3. Annual Program Review

- a. Assessment, analysis, and reporting requirements for ARC-PA and the University Level Program Review as well as any additional Program-specific assessment needs are incorporated into the Annual Program Review. This review typically takes place in the fall semester (Sep – Oct).
- b. Persons involved in the APR: The APR is a collaborative activity between the primary PA faculty/staff and representatives from across the educational community, students, alumni, preceptors, and community stakeholders.
- c. General structure of data assessment MS Excel spreadsheets: The typical structure for a data assessment spreadsheet created in MS Excel should include a worksheet of the most current data reported in a table or graph that is similar to the ARC-PA Self-Assessment Templates. As new data are added, older data should be moved to the “Old Data” worksheet of that same document. A “Raw Data” worksheet may also be needed to support data reporting. The final worksheet should contain specific instructions for that data set. Instructions should be detailed enough that someone unfamiliar with the process can replicate the data for subsequent years.
- d. Timeline for Data Collection / Assessment: [See Appendix B: Timeline for Data Gathering and Analysis](#)

- e. ***Self-Assessment Analysis:*** At a minimum, self-assessment should include critical analysis of student evaluations for each course and rotation, student evaluations of faculty, failure rates for each course and rotation, student remediation, student attrition, preceptor evaluations of students' preparedness for rotations, student exit and/or graduate evaluations of the program, the most recent five-year first time and aggregate graduate performance on the PANCE, sufficiency and effectiveness of faculty/staff, and faculty/staff attrition.<sup>[C2.01]</sup> The APR will analyze Program curriculum and student progress including didactic and experiential learning, administrative aspects of the Program, and the Program's ability to meet its vision, mission, and guiding principles.<sup>[Section C: Evaluation]</sup> The following data/documents will be collected and analyzed:

**Evaluation of Program Curriculum & Student Progress**

- Curriculum map for most recent didactic cohort
- Vision Mission Exit Survey and Graduate School Exit Surveys
- Student evaluations of courses and faculty
- Performance on PANCE, PACKRAT 1, PACKRAT 2, and EOR exams
- Courses/rotations and numbers of final course grades of C or below
- Academic warnings & remediation
- Professional warnings & remediation
- Student attrition (deceleration, withdrawal, dismissal)
- Y1 Summative Evaluation results
- End-of-Program Summative Evaluation results

**Evaluation of Experiential Learning (Clinical/Research/Passport)**

- ACYR prepared by the Dir. of Clinical Education, see item #4 for details.
- Relevant items from above (e.g. PANCE, EOR, End-of-Program Summative Exam)
- Preceptor feedback of student preparedness
- Student evaluations of preceptors / clinical sites
- Student evaluations of research advising (from exit surveys)
- Outcomes of Master's research projects (dissemination rate, research composite list)

**Evaluation of Administrative Aspects**

- CHP Climate Survey (faculty/staff)
- Graduate School Exit Survey (students)
- Faculty and staff attrition
- Sufficiency and effectiveness of faculty
- Program strengths, areas in need of improvement and plans and modifications that occurred as a result of self-assessment<sup>[C1.01]</sup>

**Evaluation of Program Vision/Mission & Guiding Principles**

- Vision/Mission statements for WSU, CHP, and PA Program
- Vision/Mission Exit Survey data
- Vision/Mission Outcome Measures of Success summary document
- Alumni, Employer, and Preceptor surveys

#### 4. Annual Clinical Year Report (ACYR)

- a. Key assessment, analysis, and reporting requirements for ARC-PA and the University Level Program Review as well as any additional Program-specific assessment needs specifically related to the clinical year should be incorporated into the ACYR and submitted to the Program Director each October. An abbreviated interim report primarily focused on sufficiency of sites and recruiting should also be completed each January.
- b. General structure of the ACYR: The ACYR should be a data-driven narrative summary including objective and subjective data collected and analyzed by the Director of Clinical Education in collaboration with the Director of Assessment and Program Director.
- c. Specific content included in the ACYR: The ACYR must provide an overview of essential administrative aspects, and the most recent cohort of students' clinical education experiences and discuss strengths/weaknesses and recommendations for improvements:<sup>[C1.01]</sup>
  - Provide narrative and data indicating institutional support in securing clinical sites,<sup>[A1.11]</sup> sufficiency of numbers/types of preceptors/sites,<sup>[A2.14]</sup> verification of preceptor licensure,<sup>[A2.16, B3.05, B3.06, B3.07]</sup> provision of preceptor contact information to students,<sup>[A2.17]</sup> and the ability of the Program to provide clinical sites without solicitation of sites or preceptors <sup>[A3.03]</sup>
  - Provide narrative and data to support how the Program's clinical education, rotation assignments, clinical experiences, and patient exposure support the Program's vision/mission and goals<sup>[B1.01, B1.06, B1.08]</sup>
  - Provide narrative and patient encounter data evaluating the sufficiency of breadth and depth of clinical experiences students receive and that students meet required expectations to acquire the competencies needed for clinical PA practice<sup>[B1.03, B3.02, B3.03]</sup>
  - Provide narrative describing the process for assignment of clinical rotations including sequencing, individualized assignment based upon student's strengths/weaknesses, location preferences, and pre-program experience, and order of EOR exams<sup>[B1.04, B3.04]</sup>
  - Provide narrative and data regarding how the Dir. of Clinical Education monitors and documents each student in a manner that promptly identifies deficiencies in knowledge or skills and establishes means for remediation including analysis of rotation failure rates<sup>[C2.01, C3.03]</sup>
  - Provide narrative and data documenting compliance with the Program's Clinical Site Visit Policy<sup>[C4.01, C4.02]</sup>
  - Student evaluations of clinical rotations
  - Provide an overall summary of strengths/weaknesses and recommendations

## APPENDIX A – Process for Identification of Peer Institutions

WSU peer institutions are determined using a three-stage process. This process focuses on institutional characteristics including mission, Carnegie Class, enrollment trends (including KBOR priorities), and budget. Analyses are based on the most recent national data and utilize strong statistical techniques designed to identify those institutions that are “most like” WSU on the most important characteristics. This process assures that actual institutional characteristics, rather than personal opinion, drive the process.

### **Stage 1 Analysis:**

- Total enrollment of 10,000 to 20,000 (similar to WSU enrollment of approximately 15,000)
- Shares of graduate students ranging between 15% - 20% (WSU share is approximately 18%)
- Within 5% of total enrollment shares as compared to WSU shares of similar disciplines within Business, Education, Engineering and other STEM (science, technology, engineering, and math)

### **Stage 2 Analysis:**

- Separately for peer institution, a connectivity-based clustering technique (hierarchical cluster analysis using an agglomerative approach) is performed using selected factors from: 1) institutional student data (enrollment, graduate enrollment, discipline shares) and 2) institutional financial data (proportions covering revenue sources and expenditure types)
- Outlying clusters are excluded and those meeting minimal distance criteria (squared Euclidean distance) are retained

### **Stage 3 Analysis:**

- The President’s executive team and college deans then separately review and select candidates
- The President’s executive team then performs a secondary review determine the final 5 peer institutions

## APPENDIX B: Timeline for Data Gathering and Analysis

| Data Source                                                                                                                                    | Jan     | Feb  | Mar | Apr     | May      | Jun    | Jul | Aug     | Sep | Oct | Nov   | Dec    |
|------------------------------------------------------------------------------------------------------------------------------------------------|---------|------|-----|---------|----------|--------|-----|---------|-----|-----|-------|--------|

COLORS: G = Data gathered; A = Data analyzed

### Other Abbreviations Used in Table

**ACYR** = Annual Clinical Year Report

**APC** = Admissions & Progression Committee

**APR** = Annual Program Review

**CC** = Curriculum Committee

**Climate** = CHP Climate Survey

**FDM** = Faculty Department Meetings

**FAR** = Faculty Activity Record

**Goals** = PA Program Annual Goals

**Grad** = Graduate School Exit Survey

**KBOR** = Kansas Board of Regents report

**Prog Sum** = End-of- Program Summative Eval

**V/M** = Program Vision/Mission Exit Survey

**Y1 Sum** = Year 1 Summative Evaluation

**Y2 Sum** = Year 2 Summative Evaluation

**Curriculum Committee:** *monthly* meetings discuss curricular issues, e.g. course sequencing, scheduling, post-course assessments, review policy/procedures, and progress on curriculum-related improvement initiatives

**Faculty Department Meetings:** *monthly* meetings to discuss programmatic, curricular, and student issues, e.g. disseminate College/University updates, review policy/procedures, progress on program improvement initiatives

## WSU PA Vision, Mission, & Guiding Principles: Outcome Measures of Success

**Vision:** Excellence in PA education

**Mission:** Transform students into highly competent PAs

**Guiding Principles:** The WSU PA Program defines “Excellence in Physician Assistant Education” as meeting our mission of transforming students into highly competent PAs. That competency is measured subjectively and objectively using the following outcomes measures of success based upon our guiding principles.

| Guiding Principle                                                               | Outcome Measures & Goals                                                                                                                                              | Goal Met?           |     |
|---------------------------------------------------------------------------------|-----------------------------------------------------------------------------------------------------------------------------------------------------------------------|---------------------|-----|
| <b>Foster an enthusiastic learning environment committed to student success</b> | <i>Vision/Mission Exit Survey:</i> ≥ 80% of graduating students will agree or strongly agree that the Program meets this guiding principle (3-year mean) <sup>a</sup> | 85%                 | Yes |
|                                                                                 | The Program’s 5-year mean for the <i>PANCE first-time pass rate</i> will be at or above the 5-year national mean                                                      | 100%<br>(96% natl)  | Yes |
|                                                                                 | Using standardized University evaluations over the last 3 years, ≥ 80% of Program <i>course ratings</i> will be ranked at or above “good”                             | 95%                 | Yes |
|                                                                                 | Using standardized University evaluations over the last 3 years, ≥ 80% of Program <i>faculty ratings</i> will be ranked at or above “good”                            | 84%                 | Yes |
|                                                                                 | The Program’s 5-year mean <i>student attrition rate</i> will be at or below that reported for the national mean (reported in PAEA annual report)                      | 4.1%<br>(6.1% natl) | Yes |
|                                                                                 | <i>Experiential Learning Passport:</i> 100% of graduating students will participate in at least 6 <i>professional development</i> experiential learning activities    | 100%                | Yes |
| <b>Promote patient-centered collaborative care</b>                              | <i>Vision/Mission Exit Survey:</i> ≥ 80% of graduating students will agree or strongly agree that the Program meets this guiding principle (3-year mean) <sup>a</sup> | 98%                 | Yes |
|                                                                                 | <i>Experiential Learning Passport:</i> 100% of graduating students will participate in at least 6 <i>interprofessional</i> experiential learning activities           | 100%                | Yes |
| <b>Model and cultivate compassion</b>                                           | <i>Vision/Mission Exit Survey:</i> ≥ 80% of graduating students will agree or strongly agree that the Program meets this guiding principle (3-year mean) <sup>a</sup> | 95%                 | Yes |
|                                                                                 | <i>Experiential Learning Passport:</i> 100% of graduating students will participate in at least 6 <i>service-learning</i> activities                                  | 100%                | Yes |
| <b>Respond to the need for primary care providers in Kansas</b>                 | <i>Vision/Mission Exit Survey:</i> ≥ 80% of graduating students will agree or strongly agree that the Program meets this guiding principle (3-year mean) <sup>a</sup> | 97%                 | Yes |
|                                                                                 | 100% of graduates will complete ≥ 18 weeks of <i>primary care clinical rotations</i>                                                                                  | 100%                | Yes |
| <b>Encourage health care for rural and underserved populations</b>              | <i>Vision/Mission Exit Survey:</i> ≥ 80% of graduating students will agree or strongly agree that the Program meets this guiding principle (3-year mean) <sup>a</sup> | 96%                 | Yes |
|                                                                                 | 100% of graduates will complete ≥ 12 weeks clinical rotations in <i>rural settings</i>                                                                                | 100%                | Yes |
| <b>Emphasize evidence-based practice and promote lifelong learning</b>          | <i>Vision/Mission Exit Survey:</i> ≥ 80% of graduating students will agree or strongly agree that the Program meets this guiding principle (3-year mean) <sup>a</sup> | 99%                 | Yes |
|                                                                                 | <i>Experiential Learning Passport:</i> 100% of graduating students will participate in 6 selected <i>research / evidence-based practice</i> activities                | 100%                | Yes |
|                                                                                 | <i>Student publication/professional poster presentation</i> rate ≥ 15% (5-yr mean) <sup>b</sup>                                                                       | 22%                 | Yes |

<sup>a</sup>Vision/Mission Exit Survey is completed annually in July prior to graduation.

<sup>b</sup>Due to lag time between graduation and publication/presentation, rate is reported 2 years after graduation.

## Learning Outcomes / Curriculum / Assessment Crosswalk

The WSU PA Program is a 26-month course of study designed to prepare students for safe and effective practice as a PA with a Master of Physician Assistant degree. To achieve this goal, all competencies and learning outcomes necessary for a beginning practicing professional are incorporated into the Program curriculum. Competencies are based on the [NCCPA's Competencies for the PA Professions](http://www.nccpa.net/Uploads/docs/PACompetencies.pdf) available at: <http://www.nccpa.net/Uploads/docs/PACompetencies.pdf>. To successfully complete and meet all graduation requirements, students must meet minimum evaluation requirements. Formative and summative evaluations occur throughout the Program, see section on [Formative & Summative Student Evaluation](#).

| Principal Learning Outcomes<br>(Expected Competencies)                                                                                                               | Curricular Component<br>used to Gain this Competency                                                                                                                | Assessment Tool / Evaluation<br>for this Competency                                                                                                                                                                                                                                                                                                                                        |

*Last Updated: Jan 2020*

*\*Response rate: 100%*

*\*5-point Likert scale ranging from very satisfied (5) to very dissatisfied (1)*

*\*This University-conducted survey occurs in Feb (5 months prior to actual program completion)*

*<sup>f</sup> Although less than 100% of students marked "yes" for volunteer community service, we have documentation that 100% of PA students were involved in at least 6 community service activities.*

### Legend

\*Above or within 3 points of the 3-yr CHP mean for that year = good

\*Between 4 and 6 points below the 3-yr CHP mean for that year = monitor

\*More than 6 points below the 3-yr CHP mean for that year = needs improvement

## Interprofessional Education Summary Class of 2019

The following pages describe several of the interprofessional education (IPE) activities within which our students participate. The definition of IPE is “when two or more disciplines learn about, from, and with each other” to enable effective collaboration and improve health outcomes.

### TeamSTEPPS Level 1 & 2

Team Strategies and Tools Enhance Performance and Patient Safety (TeamSTEPPS) is a national, evidence-based curriculum designed to improve communication and teamwork skills. Students work within small groups to discuss roles/responsibilities of their profession; dispel stereotypes of their professions; and practice teamwork and leadership using games and video scenarios with discussion reflection. PA students participate with students from medicine, nursing, PT, speech-language pathology, audiology, and social work in a level 1 event in January of the didactic year and a level 2 event in October of the clinical year.

### HP801 Interprofessional Evidence-Based Practice

This course combines PA, speech language pathology, and audiology students into a 16-week interprofessional evidence-based practice course. Students work with standardized patients and perform mock consultations with students from pharmacy, social work, and physical therapy. Students also perform a root cause analysis of a medical error case study and develop a safety improvement plan. Cases cover various psychosocial and situational issues such as polypharmacy, poor compliance, end-of-life decisions, family conflicts, and limited resources. The course allows students to develop and demonstrate all 38 Core Competencies for Interprofessional Collaborative Practice (IPEC) through problem-based learning, role play, mock consultations, patient simulation, and team self-reflection.

### Autism Interdisciplinary Diagnostic Team (AIDT)

AIDT allows PA students to work with students from audiology, speech-language pathology, early child special education, clinical psychology, PT, dental hygiene, social work, nursing, & pharmacy. The team provides hands-on training in recognizing characteristics of Autism (screening, assessment and referral) and provides a highly needed service to children and families throughout South Central Kansas. About 4 PA students participate at each event with 8 events per year.

## Graduate Research & Scholarly Projects (GRASP) Symposium

PA students have the opportunity to work with students and faculty from other health professions to complete their MPA research project. These projects are presented at the WSU GRASP symposium each year in April. GRASP is an interdisciplinary research forum for all WSU graduate students. Second year PA students present their research at GRASP and first year PA students attend as audience members. There's a combination of posters and oral presentations. Students have the opportunity to mingle with and learn about research being conducted throughout WSU.

## Homeless Veteran Simulation

A simulation activity with trained patient and family member actors. Students work in teams to develop a plan of care for a patient with a complex medical and psychosocial history. Students work with medicine, pharmacy, nursing, PT, SLP, social work, and dental hygiene.

## PA Day at AEGD

Teamwork training curriculum designed to improve communication, teamwork and patient serving skills. Students work within small groups, led by AEGD dental residents to engage, discuss and perform (real) injections for facial trauma, and learn best practices from a dental standpoint on how to best numb lips/facial areas for sutures.

## Other Interprofessional Education Activities

- **Friday Morning Observations:** Friday morning observations not only occur with PAs and MDs but also with pharmacists, nurses, social work, and rehab therapists. The interprofessional shadowing helps PA students to better understand the roles and expertise of the healthcare team members.
- **Oral Health Fluoride Varnish with DH:** Dental hygiene students instruct PA students on how to perform a general oral exam and apply fluoride varnish. Students then practiced applying the varnish to each other.
